Indian Academy of Pediatrics, Mumbai. Monthly Newsletter, Vol.4, April 2015
Respected Teachers, Colleagues, Friends and Well Wishers,

We view Medical Education as a natural extension of our value system which guides us to what is right, generate sustainable therapeutic modules, care for the child and contribute judiciously to childcare. The ethics of our science is anchored by a robust and comprehensive scientific framework. Robust standards are adopted from evidence based studies and research which lead to implementable practical solutions.

Child centric solutions are our value proposition. Being committed to the cause of scientific inclusion allows us to collaborate with GOI, regulatory processes and all our pediatricians who bring the therapeutic modules closer to our little patients. We respect the innovations and ideas which are backed by sound medical understanding to enable our members to take judicious decisions in their day to day practice.

We are sensitive to controversial issues and have integrated concerns of all our members to address them from time to time so as to ensure clear and complete messages through our various scientific interactions. IAP MUMBAI lends support to many such initiatives which will leave a lasting footprint and continually nurture EBM to our members.

Medical education is the best move in this directions and a significant endeavour of our association. We also support the members to raise pertinent questions at all our debates which provides adequate opportunities to enlighten themselves to nuances with strong scientific knowledge.
“Neonatal Hemodynamics and Cardiology” And Neonatal Simulation Workshop (Neo Pedistars) Kokilaben Hospital, Mumbai

Dates: 11th and 12th April 2015
CME: 12th April 2015, Venue: Kokilaben Hospital, Mumbai

IAP Neonatology Chapter in association with IAP and NNF Mumbai is organizing a one day CME on neonatal hemodynamics and Cardiology. It will focus on the practical issues and challenges faced in hemodynamics and management of the cardiac neonate.

Target audience: Neonatologists, practicing Pediatricians, neonatal fellows and Pediatric residents. It is designed with lectures, case studies, debates and interactive panel discussions.

CME: Fetal echocardiography, inotropes, neonatal shock, PDA, PPHN, approach to cyanotic newborn, functional echocardiography, surgical and catheter interventions in newborn.

Pre-CME workshop on Neonatal Simulation: This is a one day workshop where delegates have to perform on real life emergency scenarios in the NICU using simulation techniques. MMC credits applied.

The registration amount for the CME is Rs 1000/- and Rs. 1000/- for the Neonatal simulation workshop (draft in favor of “Mandke Foundation” to be sent before 30/3/2015). It should be sent along with complete personal details including the mobile numbers / email addresses, mailing address to:

Ms. Shaila Suratkal, Department of Neonatology, 8th Floor, Kokilaben Hospital, Four Bungalows, Andheri (West), Mumbai-53.

Organisers:

Dr. Vinay Joshi, Dr. Preetha Joshi, Dr Snehal Kulkarni, Dr. Suresh Rao Enquiries to Dr. Tanushri-9892242978 and Ms. Shaila Suratkal- 9320413102

Many children with OI are treated for fractures in the cast and the bone is left to heal in the deformed position. This causes muscular weakness and impacts the child's function.

Treatment of OI is multidisciplinary and involves a team effort. Rehabilitation of children at every stage is as important as the medical or surgical treatment.

We have an esteemed national and overseas faculty who have specific interest in OI and will deliberate about the current state-of-affairs in OI.

We also plan to launch the first "Osteogenesis Imperfecta and Metabolic Bone Disease Clinic" and the OI foundation of India — Bones.
PURPOSE

OI affects about 1:20000 children and presents with repeated fractures and progressive deformities in a growing child. The disease may manifest at birth or when the child starts to walk. Many parents are unaware that their children have OI and thus never seek proper medical guidance, thus impacting the child's life. Many reach adulthood without knowing the diagnosis and some succumb to a condition due to lack of awareness. More than 7 types of OI have been described and genetic tests are now available to diagnose OI.

The medical and surgical treatment of OI has evolved in the last decade but unfortunately the disease is least understood in the developing world leading to considerable morbidity for the child and social distress for the parents.

The purpose of this first OI meet is to bring about awareness first among the medical fraternity and the community at large so that many children can benefit from timely intervention.

“Let us Bring the Change”

PROGRAMME

PROGRAM FOR THE OI MEETING IN MUMBAI
5 APRIL 2015, SUNDAY.

9am: Introduction to the Hospital
9:10 Introduction to the Hospital
9:20 Understanding OI: Genetic Basis and Testing for OI
9:40 Clinical Presentation of Metabolic Bone Diseases and OI
10:00 Role of BMD in Osteogenesis Imperfecta
10:20 Tea
10:40 Medical Management of OI – Role of Bisphosphonates
11:00 Gas and OI: anaesthesia challenges in OI patients
11:20 Role of Orthopaedic surgery in Osteogenesis Imperfecta
11:40 Setting up an OI Centre: Experience from China
12:20 Rehabilitation in Children with OI
12:40 Discussion
1pm Lunch
1:45 Challenging cases in OI Bone Management
2:15 Managing OI – more than Bones
2:45 Living with OI (True Stories of Patients)
3:15 Discussion
3:30 Tea and Snacks and Conclusion
